🎓 Shri Govindram Seksaria...

*What's Open Source?*

Open source software is software that users have the ability to run, distribute, study and modify for any purpose.

Open source is a collaborative software-development method that harnesses the power of peer review and transparency of process to develop code that is freely accessible.

Open source is only as strong as the community behind it!!

#107 - "FOSS WINDOWS" - BY SALVATORE IOVENE, FEB. 9TH 2009

[HTTP://WWW.GEEKHEROCOMIC.COM/](http://www.geekherocomic.com/)

*Why contribute to Open  
Source softwares?  
What's in it for me?*

*Contributing to*  
**YOUR CAREER**

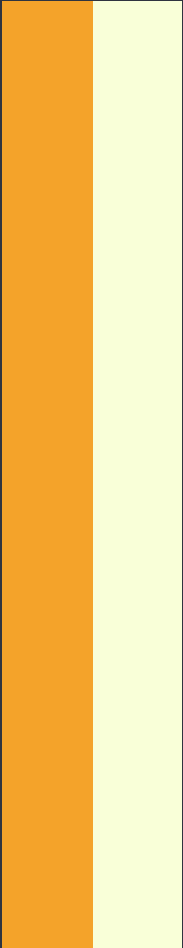

# *secret patented formula to* **GETTING ANY JOB YOU WANT:**

1. Learn skills and gain experience using those skills
2. Create public artifacts that demonstrate those skills
3. Make connections with people that need those skills

**Brandon Keepers, GitHub**

open source is a great way to  
gain *experience*, build a *reputation*,  
and make *connections*.

# Open Source is the ultimate referral

Chris Dibona,  
Google

Contributing to open source  
may not bring you *fame* or *riches*,

but it will bring you *experience*,  
*opportunity*, and *fulfillment*.

WHERE  
DO I  
START

Google  
Summer of Code

Google Code-in

[codeheat]

A man with dark hair, wearing a light-colored short-sleeved shirt and dark trousers, stands behind a podium. He is holding a piece of paper and looking towards the audience. A microphone is on the podium.

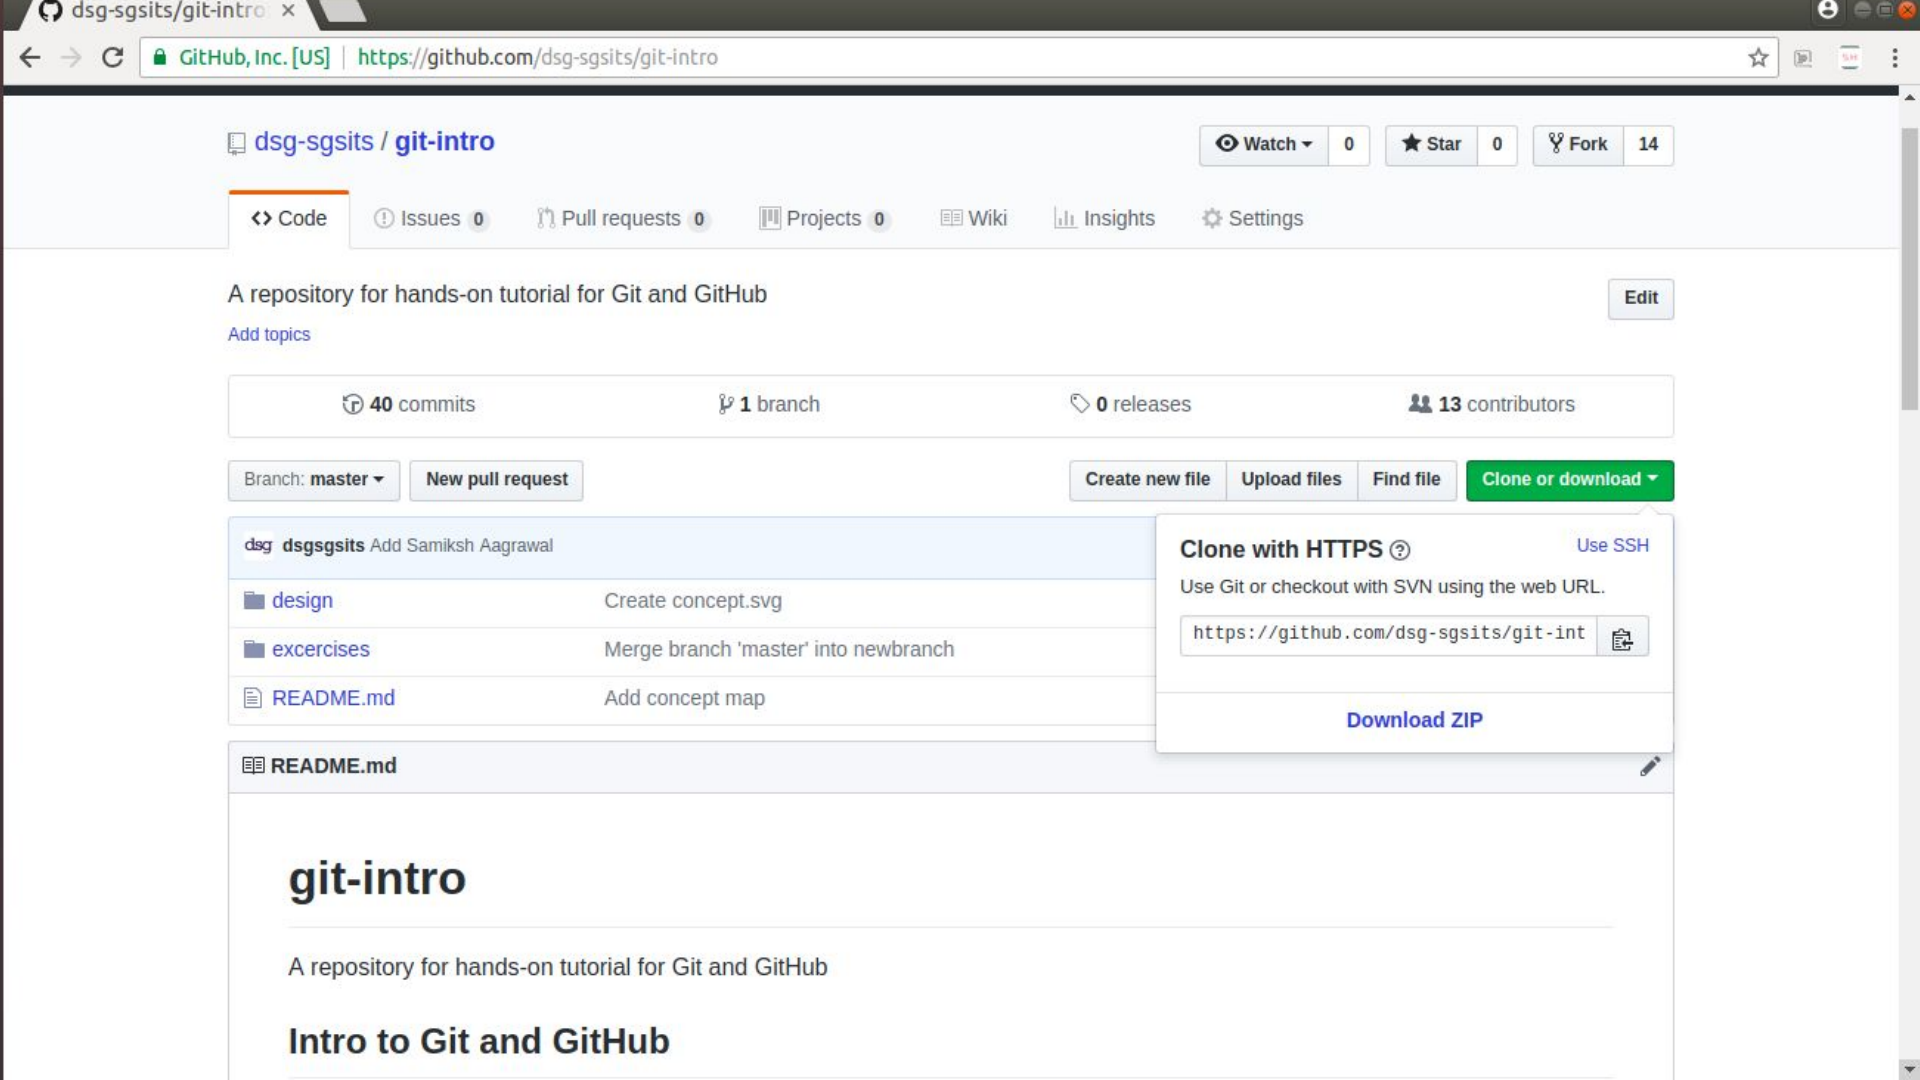

# OPENSOURCE**NEEDS**YOU!

And that's why  
you should participate in  
social coding!

Awww yeah!  
Gonna do some good with  
these skills!

A woman with short, light-colored hair, wearing a dark t-shirt, is smiling and looking towards the speaker. Her hands are clasped in front of her.

***Let's learn to collaborate***

# Forks

A fork is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

# To make a pull request:

1. base branch on remote
2. compare branch on remote

## A repository for hands-on tutorial for Git and GitHub

[Edit](#)[Add topics](#) **42** commits **2** branches **0** releases **13** contributors

Your recently pushed branches:

 **newbranch** (35 minutes ago)[Compare & pull request](#)Branch: **master** ▾[New pull request](#)[Create new file](#)[Upload files](#)[Find file](#)[Clone or download ▾](#)

This branch is even with dsg-sgsits:master.

[Pull request](#) [Compare](#) **dsgsgsits** Rename gdg-attendees to gdg-attendees.txt

Latest commit 5342e60 an hour ago

 <a href="#">design</a>	Create concept.svg	2 months ago
 <a href="#">exercises</a>	Rename gdg-attendees to gdg-attendees.txt	an hour ago
 <a href="#">README.md</a>	Add concept map	2 months ago

# Open a pull request

Create a new pull request by comparing changes across two branches. If you need to, you can also [compare across forks](#).

base fork: **dsg-sgsits/git-intro** ▾

base: **master** ▾

head fork: **mishuvs/git-intro** ▾

compare: **newbranch** ▾

✓ **Able to merge.** These branches can be automatically merged.

**So, which  
project are you  
going to**

### BUG FIX

Our maintainer  
already submitted a fix for  
that two days ago.

### NEW FEATURE

That's great, but first you'll  
need to read our 40 page  
style guide.

### DOCUMENTATION

Yeah, we totally need help  
with documentation!

But this section would  
be better written by the  
team that developed that  
feature...

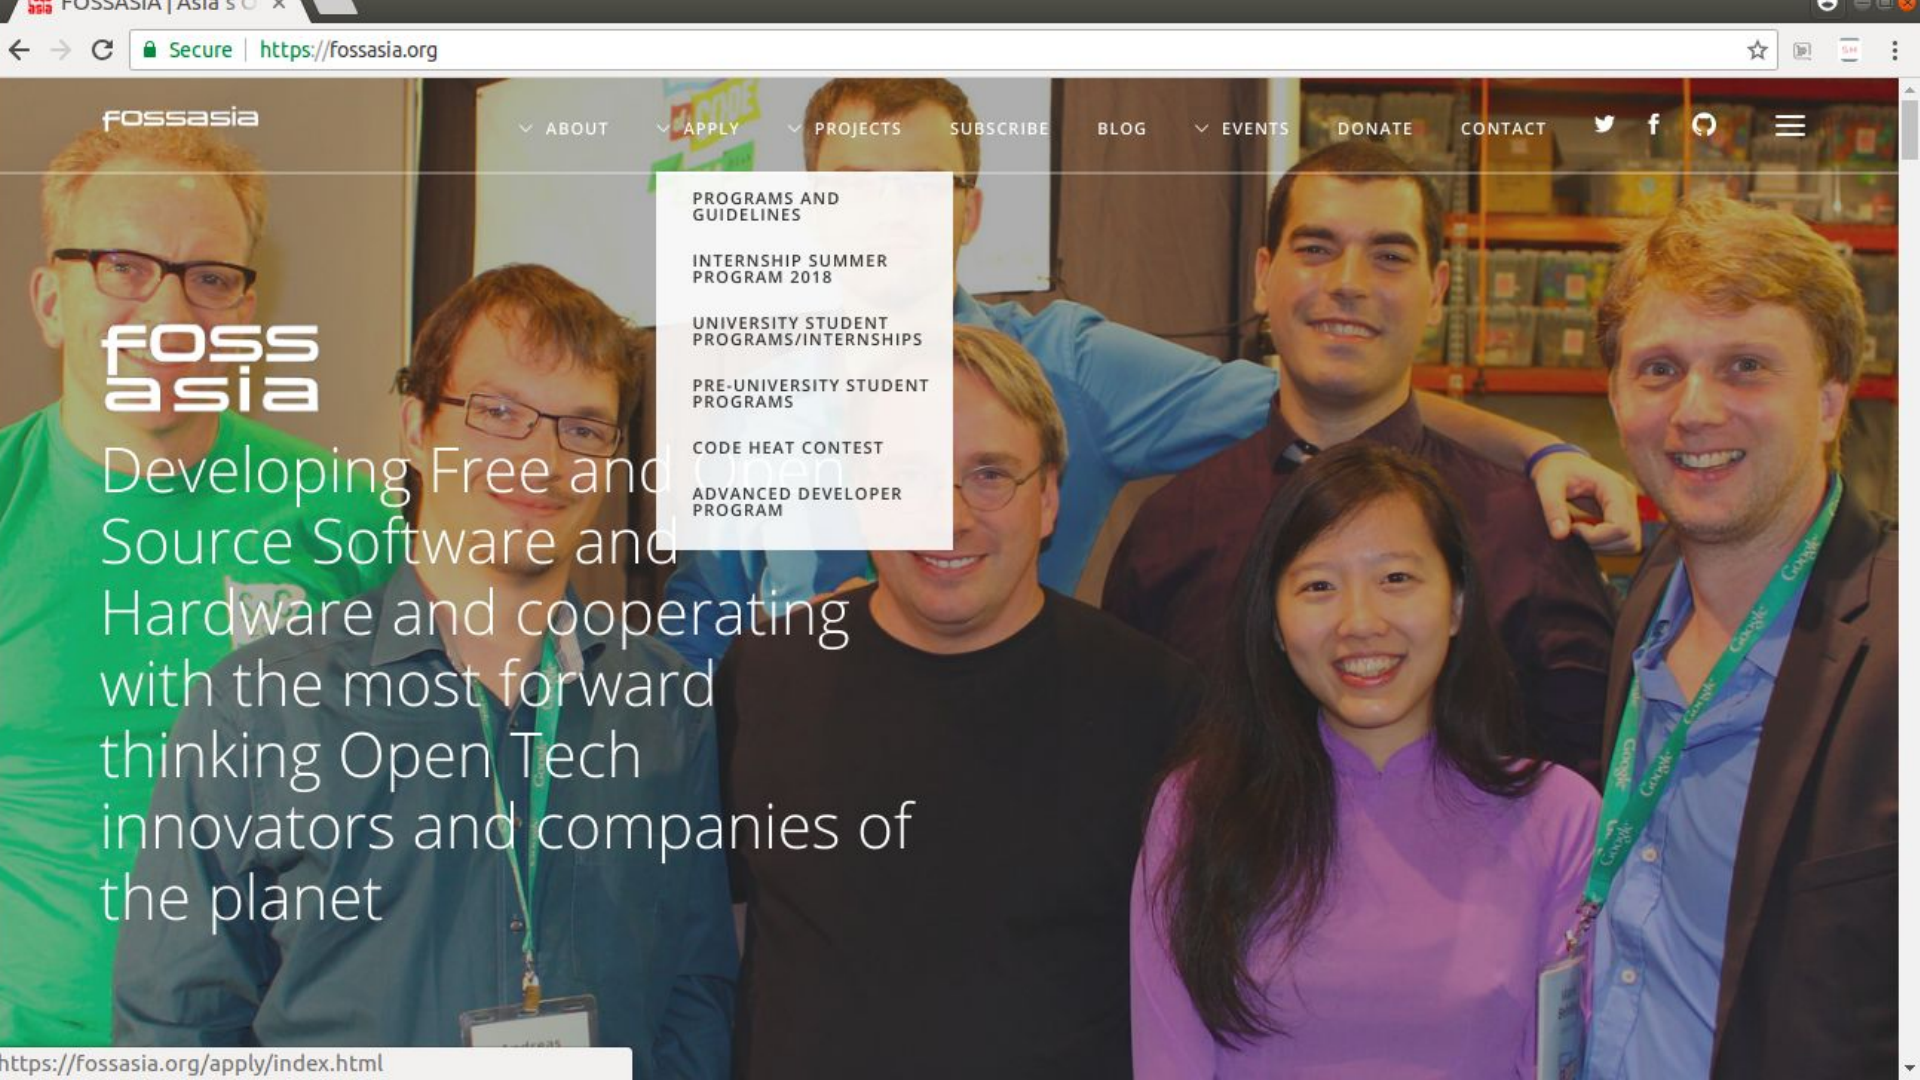

### TYPO CORRECTION

Much obliged, but you made  
the correction in the  
*compiled* code..

I don't think they need me  
after all...
